

3D LASER SCANNER

The solution
adapted to design and
inspection requirements.

FARO

Consultco combines
the very best in
inspection technology
with experience,
knowledge and
know how.

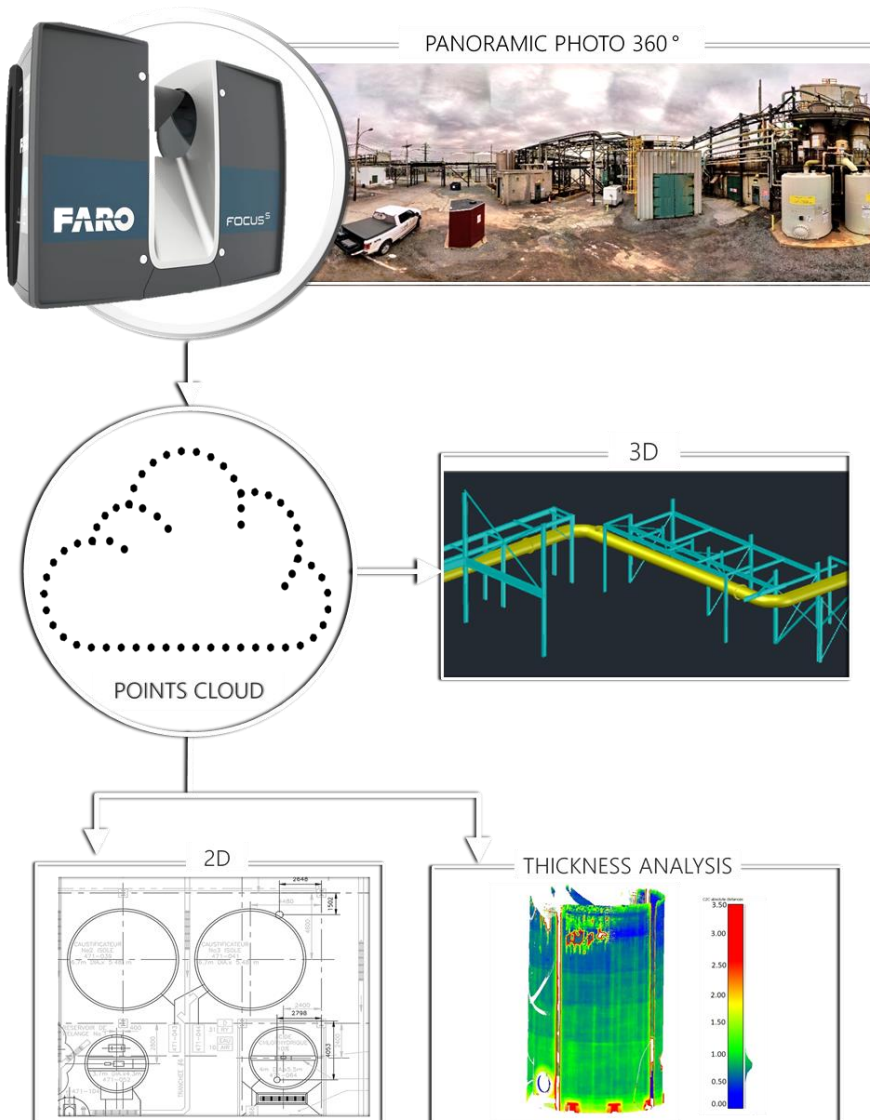

Ideal technology for:

Inspection
3D documentation
Field dimensional surveying

Create dimensional records for diverse and complex structures.

State of the art technology with multiple possibilities

Measurements
Thickness & deformation analysis
Digital reconstruction
Isometric drawings generation
Creation of floor plan
Document an accident scene

Accurate and fast

Measurement speed:
1 million pts/sec
Accurate to the millimeter

Specifications

Accuracy: $\pm 0.040''$ on $\approx 33'$ to $82'$
Field of view: 300° Vertical
360° Horizontal
